

Education for Successful Parenting (ESP)

2016 Capital Campaign

Transforming the way we prepare young people to care for our next generation of children

Childhood should be healthy and safe. Yet for millions of children this isn't the case.

Who is hurting

Children

1 in 5 U.S. children each year suffer abuse, neglect, poverty, and family dysfunction

Why

Unprepared

Many people enter into parenthood with insufficient knowledge, skills and resources

How to prevent

Educate

Long before a child is conceived, adolescent choices set the stage for a healthy future family

The Solution

ESP

Timely. Easy to implement. Cost-effective. Impactful.

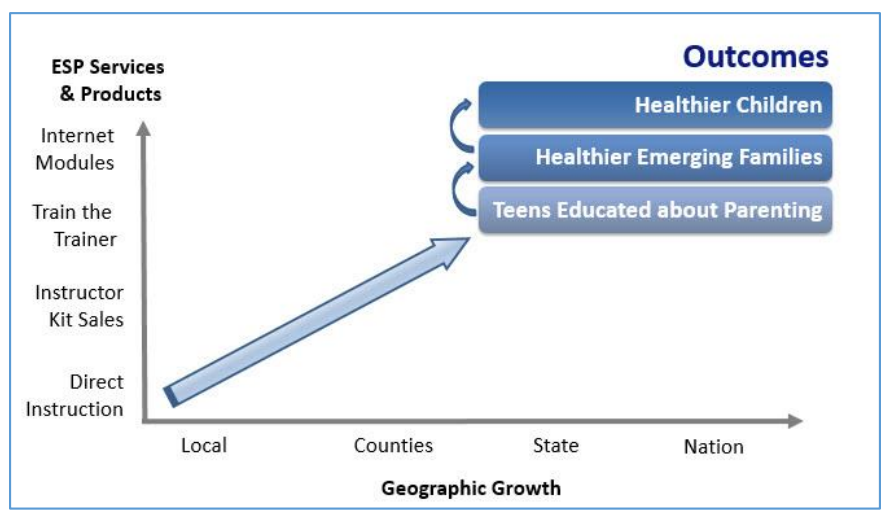

ESP educates teens about parenting responsibilities – before they form families. During ESP's interactive programs, each teen creates a personalized life-plan. Topics: healthy relationships • perils of teen parenting • prenatal health • fatherhood • shaken baby syndrome • family budgets • children's needs

After ESP programs, **96%** of teens report they will be better able to provide, protect, and nurture a future family!

"I have seen first-hand how ESP's program has helped so many kids make good decisions." – Suzan Guba, teacher at Buena Park High School

You can give a child a better beginning in life!
